Print & Play GAME OF PHONES

Preparation
Ensure that you have access to a high-quality printer and paper of the appropriate thickness to print the cards. We recommend you use A4 paper, cardstock, or photographic paper of 80gsm or more.

Print the Cards
Print the cards onto A4 paper, ensuring that you select the option to print at actual size, or no scaling. This guarantees that the cards will be printed at the correct dimensions. If your printer has the option to print double-sided, you can select this to print both the front and back of the cards onto a single page. If you do not use this option, you will need to print the face and back of the cards separately.

Cutting the Cards
Once your printed cards are dry, use a ruler and a cutter, or a guillotine to cut the cards out. Make sure to follow the cutting lines indicated within the PDF file and cut as accurately as possible to create cards of uniform size. If you prefer your cards to have rounded edges, you can then use a rounded corner cutter to give them a more professional finish.

Sleeving the Cards (Optional)
Once you have cut out your cards, you may place them into transparent protective sleeves of standard playing card size. If you have printed your card double-sided, place one card into a single sleeve. If you have printed the front and rear of your cards separately, you will need to match the front of each card with the corresponding card back before placing into the sleeve.

QUICK-START RULES

1. **Select a player** to become the Referee for the 1st turn of the game.
2. **Shuffle the cards** and then place them face down in the centre of the playing area.
3. **The Referee draws the first card** from the top of the pile and reads out its content.
4. **Each of the other players** must use their mobile phone, laptop, etc to find the item requested upon the card.
5. **After 1 minute** has elapsed, the Referee asks each player, in turn, to show the item they have found.
6. **The Referee selects** their favourite item and declares the player who found it the winner for the round.
7. **The winning player** takes the used card and becomes the Referee for the next round.
8. **Play continues** until one player has won 5 rounds, at which point they are declared the winner of the game.
